Thanasis Mylonas

Solo exhibition

Outer Space

DL gallery presents on Saturday 29th of March 2025 the first solo exhibition of **Thanasis Mylonas** titled "**Outer Space**".

A spirituality sourced from actual experience unfolds visually from a series of paintings and ceramic works. It combines concepts such as mysticism, death and alchemy, but not as we know it. The alchemy here is internal—a struggle with the fear and the interpretation of death and the quest for an existential meaning.

The life experiences described through medieval fiction become the context in which fear takes shape and transmutes. The present composition does not tell stories of fear but becomes itself the struggle. Fear, death and inner conflict are not aimed at providing deliverance but create images that explore the paradox, the obscure, the memory.

Each work is yet another re-creation of the world, a game of control, discovery and acceptance. The images do not eschew pain or insecurity but they shed light and give shape, like the loose stories in a fairy tale that strives to express the unknown.
